See the Overall Summary Charts related to their students, their subjects, leave status, etc

Take/Update Students Attendance, Add/Update Result, Apply for Leave, Send Feedback to HOD, Update Profile, Login/Logout

C. Students Can

See the Overall Summary Charts related to their attendance, their subjects, leave status, etc.

View Attendance, View Result, Apply for Leave, Send Feedback to HOD, Update Profile,Login/Logout

Django, Javascript, Python, HTML, CSS

Car Washing Management System | PHP, and MYSQL

Car Washing Management System is fully automated with different stages of foaming, washing and brushing.

In this project , we use PHP and MYSQL database.

It has two modules: Admin and User

Admin module: Dashboard, Washing Points(Add/Update), Add Car Washing Booking, Car Washing Booking, Manage Enquiries, Change Password.

User module: Home page,About us, Washing Plans, Washing Points, Contact Us.

Book Store App | MERN Stack, Tailwind CSS

– Developed a full-stack book management application with React.js for the frontend and Node.js/Express.js with MongoDB for the backend, ensuring seamless data flow and functionality.

– Implemented authentication and authorization using Context API and react-router-dom to secure restricted routes.

– Designed a responsive dark-mode UI with Tailwind CSS for an enhanced user experience.
